Sleep in Swiss style

UNRIVALLED REST QUALITY

Only those who draw strength from resting can make their big dreams come true. That's why we've developed the technology to harmonise your night and your day, guaranteeing you optimum recuperation whilst you sleep. Dream big with Philrouge dream technology.

For over 70 years, this dream technology has been at the heart of what we do as a specialist in sleep systems. Physiological measurements are combined with your rest type and the appropriate sleeping components to ultimately create your personal sleep system, providing you with the foundation to make big dreams come true in your life.

THE SANAPUR PRINCIPLE

The Sanapur sleep system combines effective pressure relief with pinpoint support, ensuring that the spine stays in the correct ergonomic position.

The combination of the mattress core and three viscoelastic foam layers that work in harmony with one another enables the body to sink gently into the mattress. This soothes and relieves the strain on joints and pressure-sensitive parts of the body.

The exquisite craftsmanship of the mattress core and the precision of the cuts and perforations that have been made to its profile perfectly complement the pinpoint support provided by the spring suspension. Two integrated pads provide additional pressure relief in the shoulder and pelvic regions.

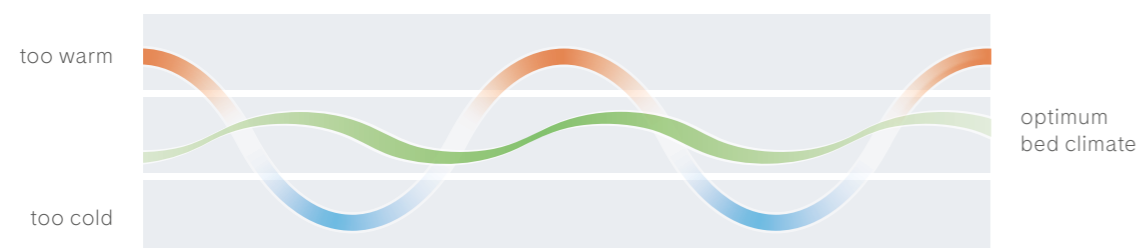

Channels that run from top to bottom and side to side inside the mattress also ensure efficient ventilation, and a pleasant bed climate as a result.

GENTLE PRESSURE RELIEF

The sleep system for ergonomic resting comfort, where the spine and joints rest in their natural position. With a multi-layered mattress core made from high-quality Senso materials, which were specially developed for the healthcare sector. The unique combination with the ultra-flexible spring suspension guarantees accurate and gentle pressure relief.

BALANCED BED CLIMATE

The innovative Thermic® technology effectively equalises temperature fluctuations. In addition to this, an ingenious ventilation system ensures a pleasant bed climate. The materials that are used are skin-friendly and breathable, and they also adapt perfectly to your body shape.

An unbalanced bed climate is unpleasant and impairs your sleeping comfort. If it is too warm or too cold in the bed, we do not sleep peacefully and the quality of our recuperation suffers. The innovative Thermic® technology continuously equalises temperature fluctuations in the bed. In addition to this, the ingenious ventilation system ensures a pleasant bed climate.

THERMIC® TECHNOLOGY

This patented system works on the basis of Phase Change Management (PCM) technology. PCM describes the physical process that is activated by myriad microcapsules – invisible to the naked eye – that are found in the mattress cover. The capsules are composed of natural substances and have the capacity to store heat as soon as the bed climate becomes too warm. The stored thermal energy is re-released when the temperature drops once again. As a result of this exchange, temperature fluctuations are continuously equalised. The best conditions for a pleasant bed climate and a peaceful night's sleep.

SANAPUR MATTRESS

Made from pressure-relieving materials, Sanapur satisfies the most exacting requirements in terms of ergonomic resting comfort. The Coonex® Senso foams that are used adapt to your body shape like a second skin, whilst simultaneously providing support and relieving pressure from sensitive parts of the body. Together with the Sanapur spring suspension, you're guaranteed a good night's sleep that's friendly on your joints.

SANAPUR SPRING SUSPENSION

The high-quality Sanapur spring suspension features numerous ultra-flexible spring elements, which guarantee maximum point elasticity and help the Sanapur mattress to work perfectly.

The tension of the spring elements, which can move in any direction, has been adapted to the various zones of the body. What's more, the hardness level can also be adjusted manually, which means you can fine-tune the mattress to your own individual ergonomic needs.

Models.

-  N – non-adjustable.
-  K – manual adjustment head.
-  KF – manual adjustment head, feet.
-  RF – manual adjustment upper body, legs.

-  2M – 2-motor adjustment upper body, legs.
-  3M – 3-motor adjustment upper body, legs, feet.
-  3MK – 3-motor adjustment head, upper body, legs.
-  4M – 4-motor adjustment head, upper body, legs, feet.

- Robust and durable lightweight aluminium frame.
- Point-elastic 360° single spring system – patented «Flex Control System».
- Spring elements made from Hytrel high-performance plastic.
- The hardness level of each spring element can also be adjusted in 3 stages.
- Spring element support slats made of beech spring slats that have been glued multiple times.
- Motor-adjustable versions come with one foot bar.
- Easy to operate using remote control unit.
- Total height 8 cm.
- RF model can be retrofitted with two motors.

SANAPUR COMFORT PILLOWS

The patented Sanapur comfort pillow supports the perfect ergonomic resting position. The body is soothingly relieved of pressure both when lying on one's back or on one's side. Thanks to the unique «butterfly» shape, the highly elastic Coonex® Senso foam and the 3D cutting technology, precise adaptation to the sensitive head/neck area is guaranteed. The pillow height can be adjusted to suit your individual needs. In addition, the signature ear hole in the centre of the pillow ensures that your ears are also spared from unpleasant pressure points.

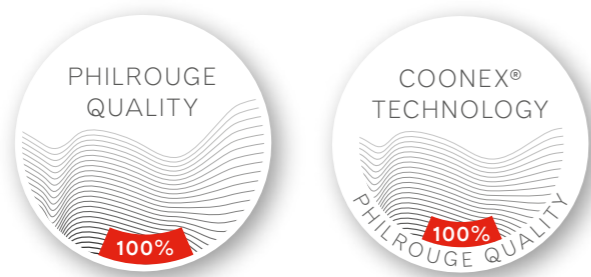

The patented solution for a gentle distribution of pressure.

- Ergonomic head hollow for a gentle distribution of pressure.
- Patented «butterfly shape» with ear hole to avoid irritating noises in the ear and/or sensitivity of the ear.
- The viscoelastic Senso foam core is exceptionally skin-friendly and breathable.
- The pillow height can be adjusted thanks to two interlayers on 7 / 8,3 / 9,7 or 11,5 cm.
- The pillow cover is easy to remove and is machine washable up to 60 °C.
- Recommended by doctors and physiotherapists.

WARRANTY

By choosing Philrouge products you are choosing first-class quality. Selected raw materials and meticulous workmanship combined with regular quality checks ensure that you will enjoy many years of stability, function and comfort from your product. We guarantee the highest Swiss quality and provide a 10-year pro-rata warranty.
